HANSA|LIVING

CREATE SPACE.

ENHANCE CREATIVITY.

MORE THAN A NEW FITTING SERIES. HANSALOFT.

In spite of its omnipresence, real style has a subtle and reserved manner that is genuinely true. HANSALOFT has this style embedded in its genes.

Its outstanding architectural design, which achieves a maximum visual impact with its expressive features, ensures the series is a real gem in trendsetting bathrooms. The "duality" of just one series is quite amazing. HANSALOFT is available in two basic shapes: a clear-cubic design with side control or harmoniously round with a centrally-controlled lever. Both versions are related, yet have distinct characters. They interpret the same concept in different ways: the undeniable quality of design is expressed through lavish dimensions, precise contours and astonishing complexity.

Angular with a striking cubic design and dynamic, forward-tilting look: the non-conforming HANSALOFT with side control. It's simply impossible to ignore it. It challenges and provokes – and shows a sense of creative determination that is rarely witnessed. Flat surfaces with a mirror finish, the gentle interaction between varying angle dimensions and perfect edges result in a functional work of art with an overwhelming presence that surprisingly offers new and exciting views from various perspectives.

A NEW PHILOSOPHY:

Cylindrical, slender, vertical: the elegant HANSALOFT with central control. Obviously related to the side-controlled version through its geometry and material properties, the gentle rounded shapes give this version the appearance of lightness and reserved elegance. The opposed alignment of the spout and lever axis provides a modern, highly individual interpretation of the classic control concept.

NEW

**THE CLEAR CUBIC X
BATHROOM:**

Unhindered by concepts and free,
yet clearly structured and perfectly
formed: the amazing look of the
HANSALOFT X bathroom.

Its individuality is the result of the
conscious concentration on just a
few shapes, exquisite colours and
exclusive materials.

FREE THINKING. STRAIGHT TALKING: HANSALOFT.

HANSALOFT for the X bathroom is the perfect fitting for
everyone who appreciates freedom in both the way they live
and the way they view life.

Its unmistakable clarity, completely free of adverse effects
and disruptive elements, provides not only the washbasin but
the entire room with a distinctive look and feel.

Due to its impressive contours and unique spatial aura, HANSALOFT in the X bathroom is an essential element of the overall architectural concept.

NEW

**THE HARMONIOUSLY
ROUND O BATHROOM:**

Personal, natural, welcoming: the HANSALOFT O bathroom combines exterior design and well-equipped interior, linear architecture and homely ambience, clear structures and flowing shapes, which are easy on both your eyes and your hands.

FREEDOM THROUGH INTEGRATION: HANSALOFT.

Integration instead of dominance: the slender HANSALOFT for the O bathroom fits in harmoniously with its surroundings, but is still a real eye-catcher. The combination of the round basic shape with the "horizontal" and "vertical" angular elements is sophisticated, the accentuation of the vertical elements remarkably elegant. HANSALOFT in the O bathroom follows and complements the style of your interior decoration – invoking a feeling of completion.

Restriction of the water flow rate to 6 l/min (indicated by the product) and intelligent stream formation ensure optimised water consumption with full comfort.

Particularly silent. Fitting complies with the strict conditions of noise protection class 1

WATER SAFE. Hitec functional core. Preserves water quality.

The right product for the modular and design-driven concealed installation system HANSAMATRIX.

Our thermostats offer maximum safety with protection against scalding

At least one product of this series has the allocated characteristics.

HANSALOFT in the O bathroom conveys the philosophy of harmonious and integral design in a discreet yet emphatic manner.

TWO PHIL UNLIMITED DE

THE X PHILOSOPHY: PURISM AT ITS BEST:

Straight lines, clear structures, maximum reduction of shapes, colours and materials: the amazing look of the X bathroom. It just exudes coolness, understatement, clarity, intensification.

Its architecture follows a strict logic – and X/O allows you to perfect this logic down to the very last detail.

OSOPHIES. SIGN OPTIONS.

THE **O** PHILOSOPHY: HARMONIOUSLY DEVELOPED PERFECTION.

Inviting as soon as you enter the door. Sensual, welcoming, personal: that's the **O** bathroom. It exudes warmth, harmony and relaxation, it is the much-quoted oasis where you can relax and recharge your batteries. The materials and shapes are easy on both your eyes and your hands. The **O** philosophy allows you to enhance all the bathroom fittings with the perfectly soft-flowing lines and gentle appearance – no matter which design you go for with the chosen fitting series.

The perfect bathroom oozes style, is lavish yet intimate. However, its design demands a completely new approach – and **HANSADESIGNO** provides just that. The washbasin, bath and shower solutions based on the concealed installation system **HANSAMATRIX** are exemplary for a range that offers more freedom than ever before.

A BATHROOM WORLD OF ITS OWN: **HANSADESIGNO**.

For bathrooms that are moving away from traditional models, **HANSADESIGNO** offers self-assured design options.

The extensive ranges of both the vertical jointless socket fitting with central control and the side-controlled version with an elegantly curved "goose neck" provide numerous opportunities to realize innovative planning ideas.

The WELL certified flow rate is limited to an eco-friendly 6 l/min.

Restriction of the water flow rate to 6 l/min (indicated by the product) and intelligent stream formation ensure optimised water consumption with full comfort.

Particularly silent. Fitting complies with the strict conditions of noise protection class 1

WATER SAFE. Hitec functional core. Preserves water quality.

The right product for the modular and design-driven concealed installation system HANSAMATRIX.

Our thermostats offer maximum safety with protection against scalding

At least one product of this series has the allocated characteristics.

The elegantly curved fitting with side control is unmistakable.

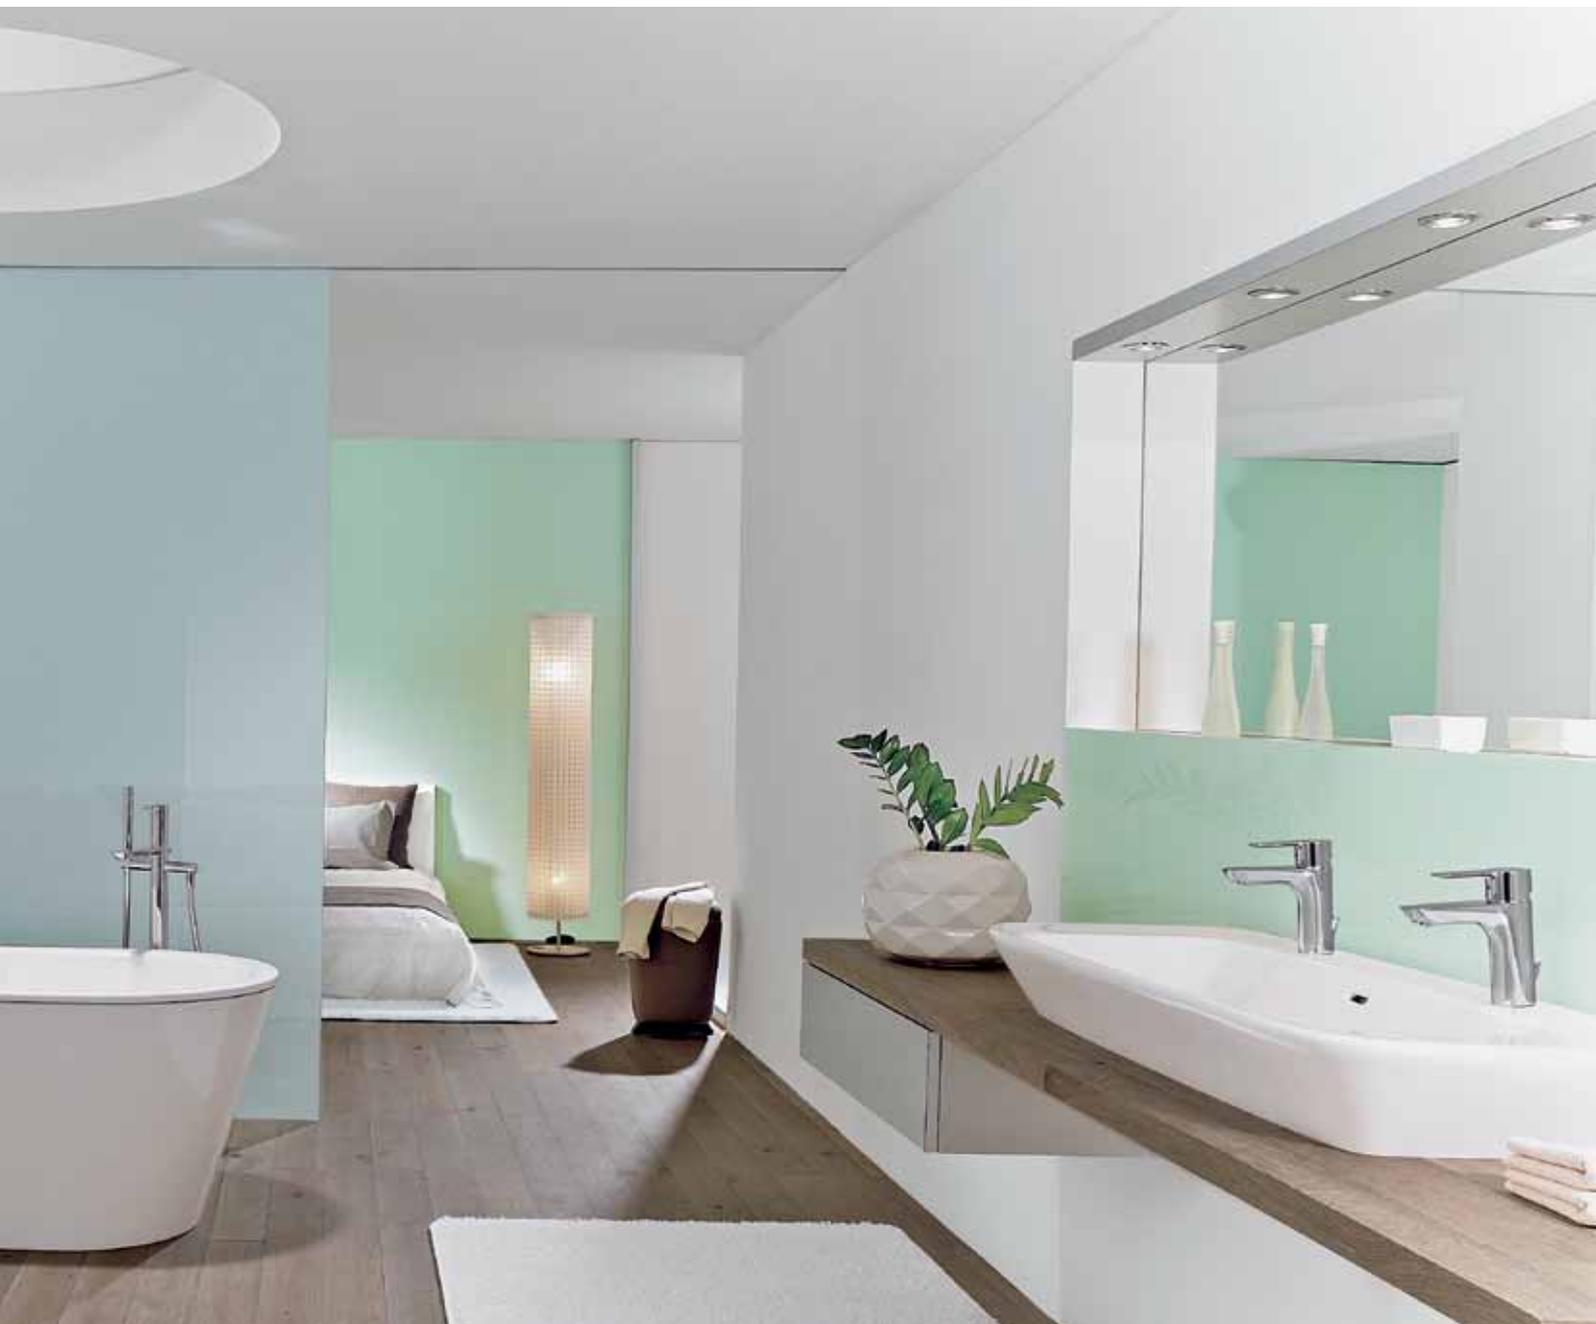

It epitomizes the perfect combination of operation, precision and design.

Whether in large open-plan bathrooms or in conventional planning solutions: HANSALIGNA catches the eye with a clean-cut, modern, extremely refined look.

WORTH MORE THAN JUST A GLANCE: HANSALIGNA.

With its characteristic, clear design HANSALIGNA provides every bathroom with a modern look. The quality of the technical aspects is just as high as its appearance: designed for comfort, safety and sustainability HANSA technology ensures optimum functionality, helps to save valuable resources thanks to the WELL certification and makes the pleasure of using HANSALIGNA an enjoyable and long-lasting experience.

Restriction of the water flow rate to 6 l/min (indicated by the product) and intelligent stream formation ensure optimised water consumption with full comfort.

Particularly silent. Fitting complies with the strict conditions of noise protection class 1

WATER SAFE. Hitec functional core. Preserves water quality.

The right product for the modular and design-driven concealed installation system HANSAMATRIX.

Our thermostats offer maximum safety with protection against scalding

At least one product of this series has the allocated characteristics.

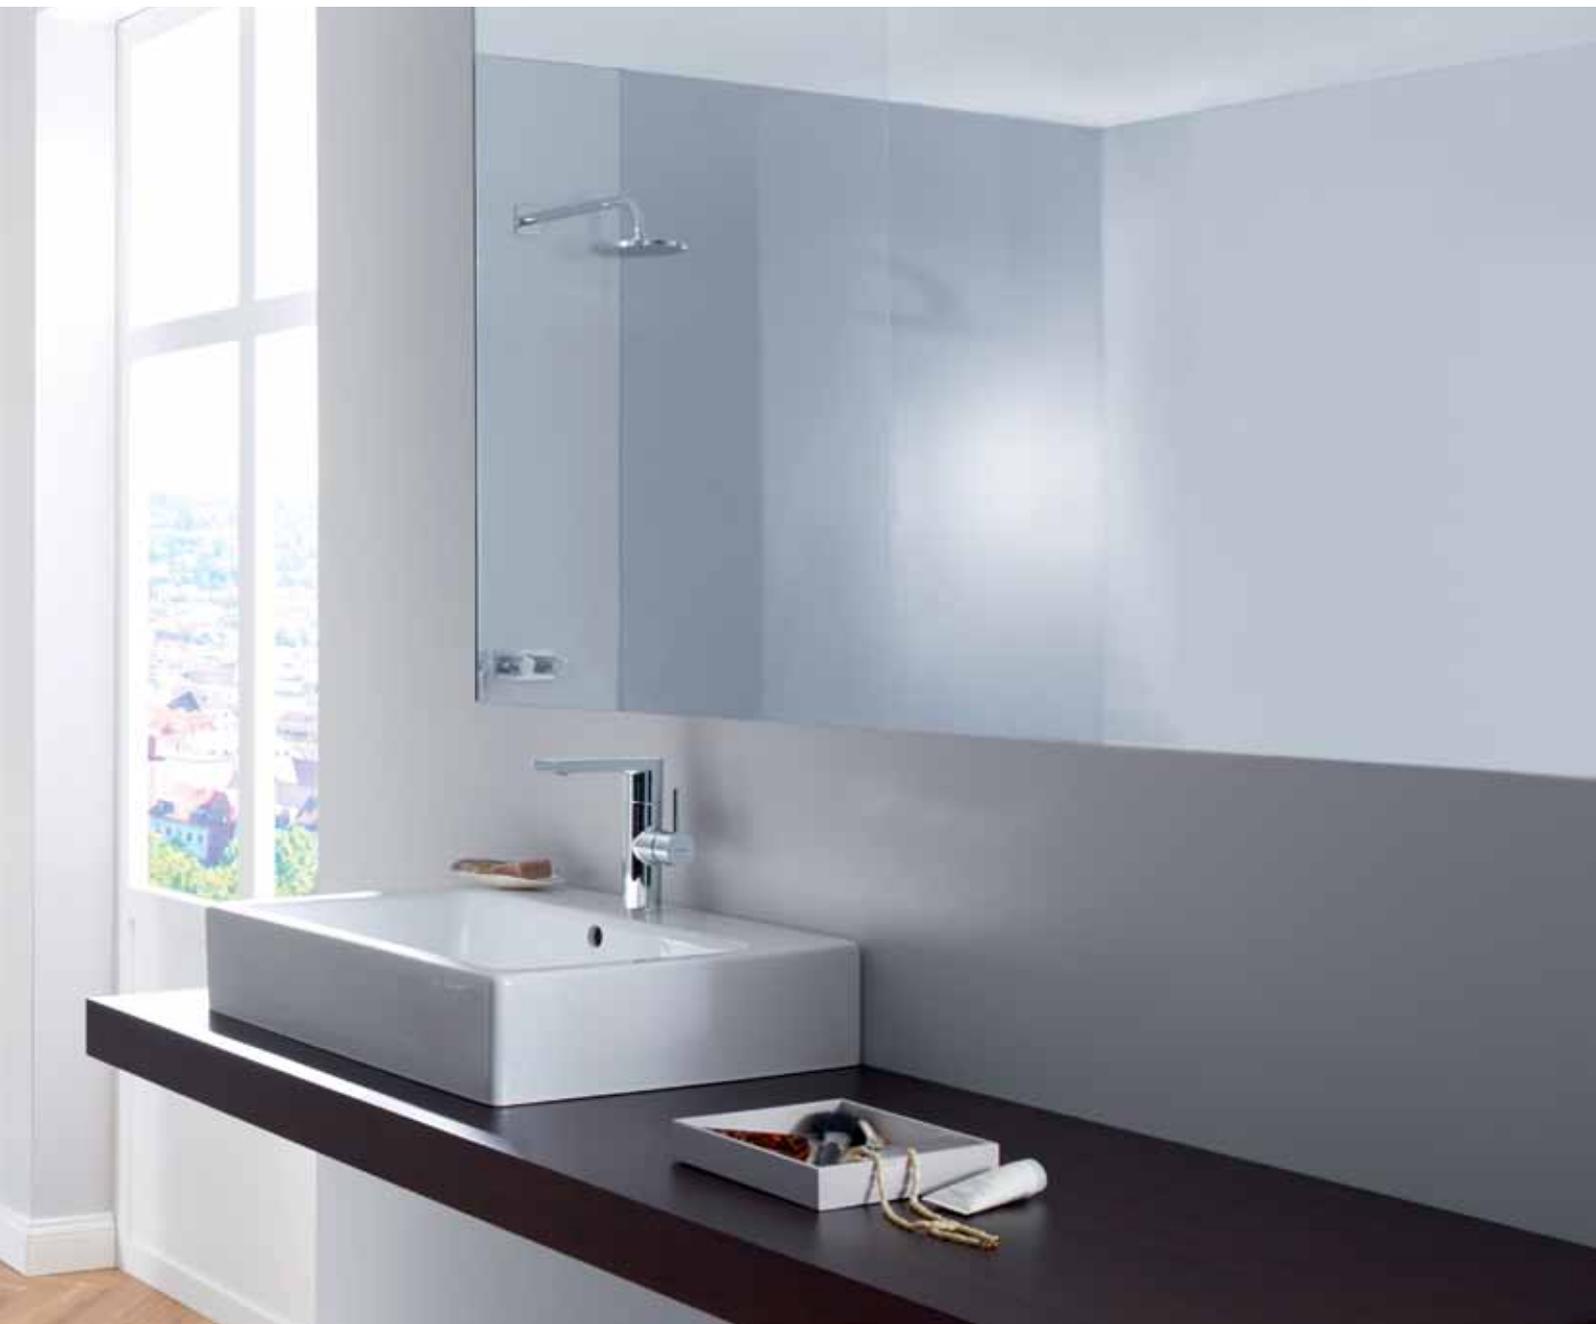

A new version with the characteristic flat operating lever at the side offers a further design option.

Self-assured appearance: the side-controlled HANSASTELEA at washbasins is a real eye-catcher in cosy yet vibrant bathrooms.

STYLE ON A GRAND SCALE: HANSASTELEA.

HANSASTELEA is a style icon for bathrooms. The combination of round operating lever and wide, angular spout catches the eye – as it is both unorthodox and unique. The new side-controlled version of HANSASTELEA is not in keeping with standard conventions: its swivel spout ensures a powerful stream of clear water without added air. Pure enjoyment – that is instantaneous and sustainable due to the WELL-certified water consumption of just 6 l/min.

Restriction of the water flow rate to 6 l/min (indicated by the product) and intelligent stream formation ensure optimised water consumption with full comfort.

Extremely quiet. The fitting complies with the strict conditions under noise protection class 1

WATER SAFE. Hitec functional core. Preserves water quality.

The right product for the modular and design-driven concealed installation system **HANSAMATRIX**.

Our thermostats offer maximum safety with protection against scalding

Unmistakable: the centrally-controlled version of HANSA **STELA** with its characteristic pin-type lever and open spout.

Harmonious shapes: the unique character of HANSARONDA is clearly expressed by the high body version.

EMOTION AND INTELLECT IN COMPLETE HARMONY: HANSARONDA.

HANSARONDA is the authentic embodiment of the principle of "harmony". The delightful combination of straight and elliptical shapes ensures the popular fitting series appears young and fresh. This highly fashionable and harmonious range enables the realisation of sophisticated, architecturally-driven projects and boasts WELL certification for its optimised water consumption of just 6 l/min.

Restriction of the water flow rate to 6 l/min (indicated by the product) and intelligent stream formation ensure optimised water consumption with full comfort.

Extremely quiet. The fitting complies with the strict conditions under noise protection class 1

WATER SAFE. Hitec functional core. Preserves water quality.

The smooth curves of the spout are in perfect harmony with the slender body of the new, side-controlled version.

WE REALIZE YOUR CREATIVE VISIONS. **HANSA**|LIVING.

The series of the **HANSA**|LIVING segment are nothing less than sensational – the perfect addition to integrally planned modern bathrooms. Characteristic designs, which are definitely a cut above the rest, satisfy the most exacting aesthetic demands. The fact that the stars of each series, the washbasin fittings, are available in two different control versions allows you to discover new levels of creative freedom from the very start: choose a fitting with traditional central control and various comfort heights or the extravagant version with an operating lever on the side – be inspired by your personal taste.

There is more or less no limit to how you impose your design philosophy on all the bathroom fittings: each series now offers not only an extensive, modular range of products, but also the elements from the **X/O** design philosophy. The variety of combinations results in an extensive range of approaches and planning strategies – without series-related limits or restrictions.

We give you the freedom of choice. Now use it!
